

Charlene Chen

Irvine, CA | (513) 693-5321 | xcchen.dev@gmail.com | hreisis.github.io

Product developer who turns complex domain knowledge into working tools. Shipped a market research dashboard and a rule-based trading indicator, drawing on work delivering architecture and master planning projects for international clients. Comfortable owning a product end to end: defining requirements, shaping the user experience, and shipping it.

01 / EXPERIENCE

Independent Product Developer & Financial Market Researcher

Irvine, CA | 2023–Present

- Developed a **macro-first research framework** that gates portfolio exposure by interest rates, the dollar, oil, and volatility, then layers sector and security-level analysis onto individual trade decisions.
- Built **GammaDesk**, a bilingual dashboard scoring market risk from breadth, volatility, dealer positioning, and events. Displayed input coverage and missing data; archived daily decisions to review subsequent outcomes. [Live demo](#)
- Designed **Signal-Lab**, a TradingView indicator translating price-action research into rule-based entry alerts, staged exits, and ATR-based exit rules; evaluated historical buy signals to refine entry criteria. [View indicator](#)
- Defined **product requirements, system logic, and data sources**; built with AI coding agents (Cursor and OpenAI Codex), integrated financial data APIs, and deployed on Vercel with GitHub version control.

Architectural Design & Project Consultant

California & New York | 2022, 2024–2025 · Project-based

- Advised on cross-border construction projects in the U.S., Latin America, and Asia, connecting overseas teams with local contacts through **site visits, drawing reviews**, and guidance on local codes.
- Reviewed drawings and provided **design feedback** for restaurant and beverage retail buildouts in California, flagging local compliance issues before submission.
- Supported **building material sourcing** for high-end apartments in New York and Panama City through technical reviews, preliminary cost estimates, supplier research, and cross-border coordination.
- Identified **manufacturing partners** through supplier research at several Las Vegas building material trade shows.

Lemuria | Co-Founder, Brand and Operations

Orange County, CA | 2023–2024

- Co-founded and ran a floral business, managing **pricing, order intake, sales and expense tracking, and cost control** with a business partner.
- Managed imported sourcing channels with **different lead times**, booking materials ahead of peak holidays and reserving stock for last-minute orders.
- Tracked seasonal demand and design trends to plan offerings; **built the brand end to end** through floral design, visual identity, photography, and social media; managed customer communication from inquiry to delivery.

WATG | Intermediate Designer II

Irvine, CA | 2022

- Designed architectural concepts for **Project Line, a 1,502-hectare coastal master plan** in Saudi Arabia, incorporating Khaleeji heritage into residential, hospitality, retail, and leisure design; produced the **architectural design report** to communicate proposals within the broader master plan.
- Developed concept and schematic designs for **Gentor Los Cabos** in Mexico, including amenities and accommodation massing shaped by terrain and coastal setbacks; **led client meetings** and design presentations.
- Produced design development and construction documents for resorts in New York and Newport Beach.

MG2 Design | Associate

Irvine, CA | 2018–2019

- Delivered design development and construction documentation for chain retail projects on tight schedules; coordinated **permitting submissions** and municipal communications.

02 / EDUCATION & CREDENTIALS

Southern California Institute of Architecture (SCI-Arc)

Los Angeles, CA | Master of Architecture | 2019–2021

University of Cincinnati (DAAP)

Cincinnati, OH | Bachelor of Science in Architecture | 2013–2017

Nucamp Coding Bootcamp

Full Stack Web and Mobile Development | 2022

03 / SKILLS

Product & AI: Workflow design, UI/UX, functional testing, AI-assisted development with Cursor and OpenAI Codex.

Research & Coordination: Market research, signal evaluation, cross-functional coordination, technical presentations.

Design & Visualization: Unreal Engine, Unity, Rhino, Grasshopper, Revit, AutoCAD, Adobe Creative Cloud.

Web Foundations: JavaScript, React, Node.js, REST APIs, Git/GitHub; AI-assisted API integration and deployment.
