Charlene Chen

Irvine, CA | (513) 693-5321 | xcchen.dev@gmail.com | hreisis.github.io | GitHub

Product builder who turns complex domain knowledge into shipped tools. Took two AI-assisted research products from problem definition to live use, and brings client-facing delivery from international architecture work. Comfortable owning a product end to end: defining requirements, setting priorities, shaping the user experience, and shipping it.

01 / PROJECTS

GammaDesk | Market Research Dashboard — 2026–Present

- Built a market decision platform for a **one-minute daily briefing**, presenting cross-asset data, options, breadth, and sector rotation; developed a **multi-factor scoring model** to assess risk and opportunity separately and guide allocation.
- Integrated an **evidence-grounded LLM** layer via OpenAI API and web search to generate bilingual briefings on market drivers, upcoming catalysts, and conditions that would change the outlook.
- Implemented a **decision-review feedback loop**, using automated daily snapshots (Vercel Cron) to compare each call with subsequent market performance; added freshness, coverage, and cached fallbacks to make data limitations visible.

Signal-Lab | Research & Automated Trading — 2026–Present

- Developed a rule-based trading strategy and **screening algorithm**, identifying breakout stages and flagging candidates for potential uptrends, with explicit entry and exit rules refined through historical testing.
- Built a **research-to-execution pipeline** from daily screening and signal confirmation to risk-based sizing, order submission, and position reconciliation; extended the indicator into an Alpaca paper-trading system.
- Specified **order-lifecycle recovery logic** for expired and partially filled orders, validating risk budgets before buy retries and verifying remaining sell quantities to prevent duplicate submissions and overselling.

Selected Interactive Projects — 2019–2023

- Built **React and React Native** apps spanning travel planning, retail, and studio booking.
- Developed interactive spatial experiences with **Unity and Unreal Engine**, including Spectrum for augmented-reality navigation and storefront discovery, and Mojave for AI-assisted urban design and spatial exploration.
- Created Wormhole, a navigable **Three.js** exhibition shown at DigitalFUTURES WebVR.

02 / PROFESSIONAL EXPERIENCE

Nova | Founder, Architectural Designer & Project Manager — CA & NY | 2024–2026

- Owned **project scoping and stakeholder coordination**, translating client requirements into deliverables and review priorities while aligning overseas teams and local partners; led **design review and issue resolution** for California retail projects, turning code concerns into drawing revisions.
- Managed **material sourcing and supplier evaluation** for New York and Panama City projects; pursued manufacturing partnerships through cost reviews and outreach at multiple industry trade shows.

Lemuria | Co-Founder, Brand and Operations — Orange County, CA | 2023–2024

- Led the **order-to-delivery workflow**, assigning responsibilities with business partners; designed procurement and inventory planning around import lead times, holiday demand, and last-minute orders.
- Developed a **cost-plus pricing model** applying a standard markup to floral, packaging, labor, and delivery costs; compared supplier prices to inform purchasing and customer quotes.
- Built the **branding and digital marketing** through photography, short-form video, and Instagram, WeChat, Rednote.

WATG | Intermediate Designer — Irvine, CA | 2022

- Designed architectural concepts and produced the design report for **Project Line, a 1,502-hectare coastal master plan** in Saudi Arabia, translating residential, hospitality, retail, and leisure proposals into a coordinated presentation.
- **Led client meetings and design presentations** for **Gentor Los Cabos** and developed site-responsive concepts; delivered resort design development and construction documents for projects in New York and Newport Beach.

MG2 | Designer — Irvine, CA | 2018–2019

- Delivered retail design development and construction documents on tight schedules, **coordinating permitting submissions and municipal communications** through successive project milestones.

03 / EDUCATION

Southern California Institute of Architecture (SCI-Arc) — Los Angeles, CA | Master of Architecture | 2019–2021

University of Cincinnati (DAAP) — Cincinnati, OH | Bachelor of Science in Architecture | 2013–2017

04 / SKILLS

Product & Data: workflow design, functional testing, market research, cost analysis, SQL, Python, Excel/Google Sheets.
Web: HTML/CSS, JavaScript/TypeScript, React/Next.js, React Native, Node.js, REST APIs, Git/GitHub, Three.js.
Design & Creative Tools: Figma, UI, Blender, Unreal Engine, Unity, Rhino/Grasshopper, Adobe Creative Cloud.
